

Case study

Bridgman House

PROJECT LOCATION

Bristol

PROJECT TYPE

Construction of a 10 bed Care Home with 2No supported living apartments

This project consisted of a New Build timber frame 10 bed care home and 2no supported living apartments. This project also included handover during the difficult time of Lockdown due to Covid 19.

The team built the home from the ground up and included all construction, landscaping, configuring of electrical, gas and water services and full decorations and fit out.

The space created was bright and high quality with consideration taken for all of the specific needs that the residents would require.
