

Case study Edwina Place

PROJECT LOCATION

Bracknell

PROJECT TYPE

New Build
12 Bed Care
Home

We have recently completed the New Build of Edwina Place care home in Bracknell for Choice Care. This included handover during the difficult time of Lockdown due to Covid 19.

This consisted of the construction of a brand new 12 bedroom care home for residents with Mental Health difficulties. The team built the home from the ground up and included all construction, landscaping, configuring of electrical, gas and water services and full decorations and fit out.

The space created was bright and high quality with consideration taken for all of the specific needs that the residents would require. It is intended that the residence is seen as homely and comfortable for all and we made sure to avoid anything that would have made the space clinical and uninviting.
