

# Case study Premier Inn, Bude

---

---

## PROJECT LOCATION

Bude

---

## PROJECT TYPE

New Build 67  
Bed Hotel

Our construction division have recently completed the complex project of a New Build Premier Inn Hotel in Bude.

This project was the full construction of a 67 bed including a large restaurant/bar flagship Premier Inn hotel right on the busy seafront in Bude.

This was a fairly tricky job as numerous potential issues had to be taken into account in particular 9 party walls and keeping the public safe as it was situated on the busy seafront.

This project was completed in conjunction with Whitbread, AXA Architects and Simpson Engineers.
