PROJECT TYPE

New build of a petrol forecourt, shop, offices, pub/restaurant

This prestigious project was a large scheme consisting of the new build construction of a Petrol station and forecourt, shop, offices, hair salon and a pub/restaurant.

The project has numerous challenges and restraints due to being situated on a busy main road and also on the Bristol airport flight path. Careful consideration was also made for existing residential neighbours who were in close proximity of the site.

As we were involved in building the scheme from the ground up, there were extensive M&E and fabric works, design input, full finishes and decorations along with feature glazing and bespoke features.
